STUDIO SECURITY

 We are a **TPN-certified** service provider.

We have ensured that our security measures are in line with the latest security guidelines set by TPN.

 All electronic devices and camera phones are strictly prohibited and shall be stored in the designated lockers before entering the sensitive production areas.

 Access to the studios and production areas is monitored and allowed to employees using their personalized access cards only.

 Computer CPUs are physically locked in cabinets to prevent physical access and their USB ports are disabled as well.

 Industry standard end point protection systems are deployed on all network nodes and computers.

 All the employees and third parties are required to sign an NDA with severe consequences if breached.

 Our production networks and corporate internet enabled networks are separate and isolated.

 The facility is under 24/7 surveillance through CCTV cameras.
